

Minju Sung

(347) 935-2043 | Boston, MA | sung.minj@northeastern.edu
github.com/minjusun | linkedin.com/in/minjuSung

Education

Northeastern University, Boston, MA

Expected May 2028

Bachelor of Science in Computer Science, Mathematics Minor GPA: 3.88/4.0

Honors & Awards: Dean's List, Presidential Volunteer Service Lifetime Achievement Award, Senator Shelley Mayer's Citizenship Award, Provisional Patent: *System and Method for Predicting Car Accidents*

Coursework: Program Design & Implementation I and II, Introduction to Databases, Discrete Structures, Computer Systems, Algorithms

Extracurriculars: Northeastern Debate Society Tournament Member, Noreste Ballet Company performer

Technical Knowledge

Programming Languages: Java, Javascript, Python, C, MySQL, HTML, CSS

Web & App Technologies: Power Apps, Dataverse, SharePoint, Power BI, Docker, Godot, Power Automate

Tools & Platforms: Git/GitHub, IntelliJ, VSCode, Jupyter Notebook, Streamlit, Flask, Scikit-learn, DataGrip

Work Experience

United Nations OICT | NYC, NY | Application Developer | Fellow

December 2025 - March 2026

- Led a cross-functional team in a UN-hosted hackathon to modernize donor funding management for global mine action programs by designing a scalable application workflow with **Power Apps** and identifying automation opportunities to reduce manual processing
- Developed an AI-powered contract parser and improved reporting accuracy from 80% to 99%
- Collaborated with OICT and UNMAS stakeholders to productionize and publish the application for use across multiple UN departments
- Designed system architecture and produced Technical Architecture Framework (TATF) documentation and C4 diagrams to formalize system design and guide deployment across UN infrastructure

PowerHouse for Kids | NYC, NY | Application Developer Intern

September 2019 – January 2025

- Programmed and maintained a database system supporting 500+ participants, streamlining registration, scheduling, and attendance tracking
- Led the 2024 migration to a cloud-based platform, improving accessibility and scalability across multiple branches
- Supported administrative operations by processing registrations, assisting families, and resolving enrollment and scheduling conflicts

Projects Experience

Northeastern University | Leuven, Belgium | Project Team Member

May 2026 – June 2026

- Engineered a K-Nearest Neighbors (KNN) crop recommendation model using cosine similarity, one-hot encoding, and feature standardization across 39,000+ agricultural records, improving prediction accuracy from 49% to 99.3% through feature engineering and hyperparameter optimization
- Evaluated model performance using cross-validation and accuracy-based metrics to identify optimal parameters and ensure reliable generalization on unseen data
- Developed a farmer-facing prediction platform using **Streamlit**, **Flask** REST APIs, and **MySQL**, enabling users to generate crop recommendations, save prediction histories, and access model-driven agricultural insights

Personal Website | Github

June 2026

- Developed and deployed a personal portfolio website using **HTML** and **CSS**, creating responsive layouts and integrating GitHub, LinkedIn, and resume links to showcase technical projects and professional experience in a centralized platform.
